

AI Acknowledgement Form

AI (ChatGPT) was used in this assignment.

Code that AI assisted in:

- Adjusting my map's code to allow for looking up values in a separate file,
- Implementing selections,
- Lots of debugging,
- Editing minor aspects such as axis labels,
- Suggesting alternatives for a treemap,
- Html assistance,
- Implementing more complicated labeling

AI was very useful for debugging and editing code I had already started on; however it struggled with suggesting alternatives that could actually be made on Vega Lite, as well as implementing new selection tools. AI was rarely the first source I went to however in many cases it was also not my last source (hence why I needed to search through stack overflow forums as mentioned below). Overall, I am grateful to have been able to use AI to push me through hurdles within this assignment.

The following links show my exact logs:

- <https://chatgpt.com/share/68fcbda1-562c-8000-8876-dc53fb63de38>
- <https://chatgpt.com/share/68fcbdba-2af4-8000-a231-13eb9ea921f1>
- <https://chatgpt.com/share/68fdca63-8cdc-8000-a43f-e1d0ba948435>

Not AI usage but many of my graphs followed templates I found on the following sites:

- Vega Lite published examples,
- The solution in this stack overflow thread:
<https://stackoverflow.com/questions/68251462/how-do-i-make-the-outer-and-inner-donut-charts-a-full-circle-if-their-value-are>
- For displaying labels on the donut chart:
